

FROM STREETS TO SCORES

Inventories, the walk, and what is reported

Also stored: nearest 1 and nearest 20; 3.5 km/h. Straight-line times are a check, never the result.

Left: the four inventories. Middle: hexagons, streets, and the 15-minute walk.
Right: F15, Gini, N* and the plates. Empty hexes stay; completeness is a table.
Walk graph, five nearby GRID3 clinics and schools, 5 km/h.
